

CLCI in Partnership with BPS Resolver:

Building a High Performance Organization

The Corporate L.I.F.E Centre International (CLCI) has created a **three phase** process to transform your company into a High Performance Organization (HPO). CLCI uses its proprietary Integrated Performance Management (IPM™) methodology to deliver Performance Measurement and Management Systems (PMMS) in a Strategy Focused Organization.

In the **1st phase**, CLCI works with the senior leadership of the organization to design a strategy for the organization. The **2nd phase** translates this strategy into a Strategy Map, which shows a visual representation of how the organization describes the logic of the strategy. From the Strategy Map a Balance Score Card (BSC) is created using Resolver*Risk, which helps mitigate the risks around reaching each objective in your BSC.

In the **3rd phase** of implementing the strategy, Resolver*Risk also allows the user to add action items, tasks and the use of workflow to the objectives in the BSC. With Resolver*Risk each employee has tasks and objectives assigned to them, which corresponds to their position within the organization. Using Resolver*Risk to implement this process allows the continuity of the strategy even if the BSC is modified or if there is staff turnover.

prioritize risks, evaluate controls, perform tests, and track and manage issues and action plans.

Managing compliance efficiently within an organization requires the assistance of multiple people. Resolver*Risk enables enterprise-wide data collection and reporting. Users log in using a secure corporate site to access or report on the items or actions to which they have permission.

Resolver*Risk makes executive reporting quick and simple. Drill down on any report or dashboard to get the perspective you need.

Many of our clients choose to start their GRC program with a single compliance effort (ie. Internal Audit, IT Governance, NERC, SOX, etc.), and then expand as resources permit. With Resolver*Risk, expansion is easy. Simply add another effort into the system to create a more expansive GRC platform. Because of its scalability, Resolver*Risk is the obvious solution for any sized company.

We understand that your compliance efforts are on-going. With Resolver*Risk's workflow functionality, users can handle items in sequence - complete with alerts - so that tasks are completed in time to meet any deadlines you may have set.

Resolver*Risk's structure allows users to document processes, assess and

BPS Resolver Inc. is registered with the National Association of State Boards of Accountancy (NASBA) as a sponsor of continuing professional education on the National Registry of CPE Sponsors. For more information, visit: www.bpsresolver.com or www.nasba.org
